

TABLE 3. Response rate stratified by the level of protection due to previous screening. Intention-to-screen response rates are presented as absolute numbers, proportions (per 100) and 95% confidence intervals (CI) by the study group and the region of residence.

			Level of protection			
			Medium		No/low	
			Number of women	Response rate per 100 (%) with 95% CI	Number of women	Response rate per 100 (%) with 95% CI
STUDY GROUPS	I1	all responders	6,796	51.5% (50.3%–52.7%)	7,604	18.3% (17.5%–19.2%)
	I2	all responders	3,501		1,395	
	P	all responders	4,540	54.8% (53.3%–56.2%)	5,016	22.2% (21.0%–23.3%)
		<i>p-value</i>	2,486		1,112	
REGION	Celje	all responders	1,128	33.7% (30.9%–36.5%)	1,472	6.7% (5.5%–8.1%)
	Maribor	all responders	380		98	
		<i>p-value</i>	< 0.000*		< 0.000*	
			5,361	50.4% (49.0%–51.7%)	5,694	17.0% (16.0%–18.0%)
		2,700		966		
		7,103	51.6% (50.5%–52.8%)	8,398	19.5% (18.7%–20.4%)	
	<i>p-value</i>	3,667		1,639		
		0.163		<0.000*		

*Statistically significant result at $\alpha = 0.05$.
